

We don't hire smart people and tell them what to do.

We hire smart people so they can tell us what to do. (Steve Jobs)

FlowLogiX is an innovative startup rooted in Dresden. Emerging from the renowned University of Technology Dresden (TU Dresden), we are dedicated to developing cutting-edge software solutions that streamline automated in-house transport systems. Our mission? Navigating the complexities of intra-logistics in an increasingly digitalized world, harnessing the power of IoT, Industry 4.0, and artificial intelligence to deliver effective solutions.

To extend our dynamic team, we are currently seeking a full-time

## Fullstack Software Developer (f/m/d)

### Your role:

- You assist in product or project development, or both.
- You develop & design GUI & Backend.
- You help build our monitoring and simulation software.
- You maintain close contact with our customers to understand their requirements and adjust our software solutions accordingly.

### Requirements:

- Excellent knowledge in Java, TS, or C#
- Experience in software design and a fundamental technical understanding
- Fluent in English, both spoken and written
- Self-reliant and responsible work approach
- Solution-oriented mindset

### What we offer:

- An exciting opportunity to take on challenging tasks with the latest technologies
- An open and dynamic international team culture at a modern workplace, the choice of your own hardware, flexible working hours, and of course the option for remote work
- A competitive salary with additional benefits such as childcare allowance and a company bike
- Support for your personal and professional development
- 30 vacation days per year for your physical and mental well-being
